

1 ALGEBRA ZESPOLONE

WZORY REDUKCYJNE + POTEGI + PIERWASTKI

X jak neyble ogarnac weong redukcijne w pruhtyce gdy ich nie

$$\sin\left(2\pi - \alpha\right) = \sin\left(-\alpha\right)$$

WYOBRAZ JE ZE $\alpha = \frac{\pi}{6}$ TAK WEC ZGADRA

SIE WYKRES SIMJA ALE JEST NA ODWRTT WIEL

 $\sin\left(-\alpha\right) = -\sin\alpha$

DLA
$$\cos(90^{\circ}-d) = \cos(\frac{\pi}{2}-\alpha)$$
 The population $\alpha = \frac{\pi}{6}$

3 NO I TERAL ZASTANAWIASZ SIĘ JAK WYGLADA

$$\oint DLA \cos\left(\frac{T}{2} + d\right)$$

$$\forall W.90:$$

$$\cos\left(\frac{\pi}{2} + \alpha\right) = -\sin \alpha$$

POTEGI wzór Moivréa

PIERWIASTKI

$$n\sqrt{Z} = n\sqrt{|Z|} \left(\cos \frac{p+2k\pi}{n} + i \sin \frac{\varphi+2k\pi}{n}\right)$$

High
$$\omega_n$$
 (pierany pieramiteh) wajdie prosty to halone motion little z wrong $\omega_n = \omega_{n-1} \left(\cos\frac{2\pi}{n} + i\sin\frac{2\pi}{n}\right)$

ALGEBRA RESPOLONE

gratiane - c.d.
